

The *My Tracks* module provides each user with a variety of tools, all in one place, by streamlining each person's activities in the program.

A user can configure any combination of tools, but the availability of tools will reflect the permissions for each user. For example, a user with no authority to access Lab modules, will not have the My Lab feature in their *My Tracks* module.

My Tracks is customized and specific for each Tracks user. Select "Preferences" to configure this module.
